WIRE MESH BASKET WITH QUICK LOCKING DEVICE <

- Rapid fitting
- Fixed connection of protective wire mesh basket and suction strainer
- No trapping of the venting line possible
- Small spatial requirement in the vehicle
- Can be stored whilst fitted

➤ Protective wire mesh baskets generally serve to protect suction strainers and suction lines from contamination through leaves, twigs or stones from still or flowing water and thus protect them from blockages. **With the new AWG protective wire mesh basket with quick fastening in the form of a fixed tensioning ring for standardised, size A suction strainers, the past difficulties of fitting conventional protective wire mesh baskets with bungee cords can be forgotten.**

The new AWG protective wire mesh basket is equipped with a special quick fastener. This is opened, the protective wire mesh basket pulled over the suction strainer, the fastener's clasp closed – and the protective wire mesh basket is locked in place and ready for use!

The compact design of the protective wire mesh basket and the new mounting system ensures that the eye hook on the side of the suction strainer housing always remains freely accessible enabling the actuation of the emptying device.

Technical Data

Nominal size	DN 100
Length / Width / Height	120 / 350 / 350 mm
Weight	1,2 kg
AWG Id-No.	101 174 48
