

AWG HiPress Basic

The basic of the well-established Portable High Pressure Extinguisher

- The portable High Pressure Extinguishers AWG HiPress and HiCafs are meanwhile the most modern devices in the everyday employment in view of prompt, simple and efficient fire fighting without water damage. Ideal for first attack, apartment fires, fires in their early stages – without any movements of hoses.
- Benefit from our recently developed AWG HiPress Basic with its strong effectiveness as a competitive introduction model. Upgrade to full version of HiPress and HiCafs is possible any time.

The extinguishing principle

Compared to the common stirrup pump, the new AWG HiPress Basic has an operating pressure of 15 bar. The pressure is created by filling with usual gases such as CO₂, nitrogen or compressed air. This portable High Press Basic is a high-performance Extinguisher for fire classes A and B.

In addition, the High Pressure Extinguisher is extremely economic while increasing extinguishing power at the same time. Due to the fast and easy refill of the HiPress it is very user-friendly in handling.

Advantages

- Device with continuous pressure
- Refilling with usual gases such as CO₂, Nitrogen or compressed air
- Approval number: SP 45/08
- Approval electric conductivity for all extinguishing agents
 - Water + AFFF
 - Frost-proof up to -25°C
- Accessory equipment available e.g. back-pack, refill appliance according to EN + CGA Standard
- Upgrade to full version HiPress and HiCafs (10 litres) possible any time

Technical data

Filling volume	6 litres
Operating pressure	15 bar
Throw distance	max. 10 m
Minimum function time	app. 45 sec. continuous jet
Weight	max. 15,5 kg
Ident No.	60747799
